TNR DOORS

Tough 'N' Ready For Your Challenging Environments

TNR Industrial Doors is an employee owned and ISO certified company that is emerging as the industry leader in the manufacturing of specialty high performance doors. Our dedicated team of professionals has over 435 years of combined experience in engineering, application problem solving and project management.

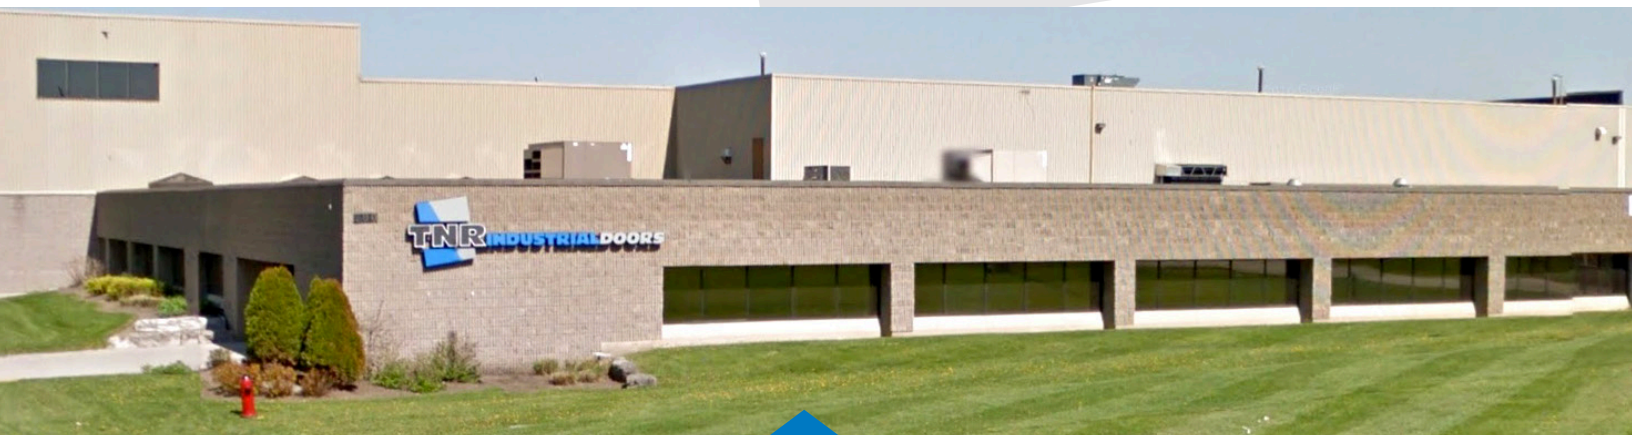

TNR high performance roll-up doors are designed to meet the specific needs of businesses worldwide. We encourage you to visit our website for testimonials, case studies and videos, or you can call us to arrange a site visit by one of our knowledgeable Regional Sales Managers.

OUR FOCUS ON CUSTOMER SUCCESS

Complete customer satisfaction is our goal. TNR will earn your referrals and repeat business, because our doors keep customers' costs down and their productivity up. TNR doors are "Built to Suit" your specific application requirements. Simply put, our doors work and they last a life time!

CORE VALUES

- Our customers and suppliers are treated with respect and integrity. We value the commitment that they have placed in us.
- We approach each other with honesty, care, and mutual respect. We foster a fun team environment that allows everyone to contribute his or her knowledge and expertise. We fulfill our potential through continually learning.
- The TNR team acts ethically at all times and conducts itself responsibly within the community at large.

PRODUCTION FACILITIES AND CORPORATE OFFICE

TNR was founded in Barrie, Ontario in 2003 with six employees located in a modest 12,000 square foot facility. Today while remaining in Barrie, the TNR Team has grown to sixty-five employees working in our 123,000 square foot facility pictured above. This modern facility has room for our continuing growth and it is well situated directly beside a major shipping corridor, where we are able to serve our North American and International markets, today and well into the future.

DESIGNING CUSTOM DOOR SOLUTIONS

A Sound Investment

Doorways in your operation are inevitable; it's what you put in them that makes a difference.

TNR doors unique product capabilities have revolutionized the door industry by providing a more reliable, more durable, longer lasting performance with greater impact ability. TNR doors will substantially reduce your long-term cost of ownership and provide the lowest life cycle cost available.

TNR provides the industry's most reliable and durable door systems, which produce a fast return on investment. Depending on the application the typical Return On Investment of a TNR door is between 12-36 months, when considering the following criteria:

- 
- **Increased Productivity**
 - **Energy Savings**
 - **Maintenance Savings**
 - **Minimized Downtime**
 - **Energy Efficiency Rebates**
 - **Enhanced Safety & Security**

TNR will design and build a custom door for your application that takes aim at reducing your operating costs. We have a broad range of door models to service all four of our key industry segments:

- **Mining & Industrial**
- **Food & Beverage**
- **Parking & Automotive**
- **Logistics & Transportation**

KEY DESIGN CONSIDERATIONS FOR EVERY CUSTOM TNR DOOR

- **What are the estimated door cycles per day?**
- **What opening & closing speeds are required?**
- **Are there special safety concerns to be addressed?**
- **Which access controls work best for your application?**
- **Are there significant exterior wind loads or internal building pressures to consider?**
- **Are there corrosive or other environmental conditions?**

TNR's sales and engineering teams have the expertise and industry knowledge to address all your unique design requirements. Considering the specifics of your door application helps us ensure that you make a sound investment in the doors that we build for you and your customers.

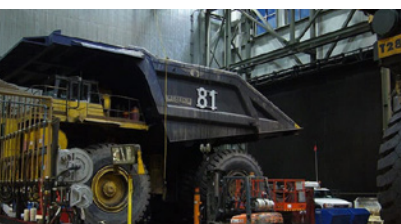

MINING & INDUSTRIAL

RUGGED DURABILITY IN HARSH ENVIRONMENTS FOR LARGE VEHICLES & HEAVY EQUIPMENT

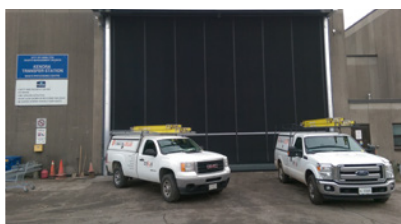

Mining and heavy industry often have large doorways that are heavily used for large equipment access. These environments, often harsh and abusive, are well served by TNR's durable door design and construction. TNR has several door models that can meet the specific needs of mining and industry. From basic economy doors to rugged extra-large doors, all our rubber doors are a heavy duty design delivering both high speed and high cycle performance. Even when a heavy vehicle impacts our door, it is reset and running again in minutes. These high performance doors reduce energy loss through the opening and increase productivity.

TNR has its roots in the mining industry, so it's in our blood to design doors that can withstand the most demanding conditions.

- Large and Extra Large doors – designed for reliable operation around large equipment, doors up to 55 feet wide or 45 feet high
- Harsh Environments, Low Maintenance – simple, rugged design and heavy duty door components ensuring maximum uptime and reduced maintenance costs
- Options for explosion proof and corrosion resistance are available to ensure safety and stand up to the harshest environments
- High Windloads – Big doors catch big winds – Our patented CurtainLok™ and NewGen® guide and optional traveling windbar ensure that our doors will stay in place when the wind blows but still releases safely with an accidental vehicle impact
- Proven applications of TNR doors in mining, heavy manufacturing, steel, pulp and paper, waste management and oil and gas at locations around the world

HDXL, mining equipment service building

HDL-DD, waste transfer station

HDXL, wood particle board production

HDXL, transport trailer paint booth

TNR High Performance Roll-up door models for Mining & Industrial Applications

- HDM - Manual Rubber Door
- HDE - Economy Rubber Door
- HDL - Large Rubber Door
- HDL-DD - Large Rubber Direct Drive Door
- HDXL - Extra Large Rubber Door
- HDC-DD - High Cycle Rubber Direct Drive Door

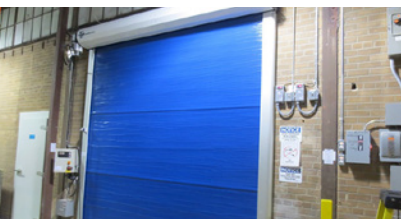

***MINIMIZE INFILTRATION, MAXIMIZE SEPARATION.
MAINTAIN HIGH TRAFFIC FLOW AND PRODUCTIVITY***

Production facilities involved in any type of food processing, have interior doorways that require very quick and frequent access. It is also important that doors for these access points minimize infiltration of contaminants and reduce air flow between work areas. TNR Doors offers several door models that feature designs to specifically address the demands of this market segment. Our Fabric doors are fast, affordable and easy to install and maintain. An insulated fabric door maximizes productivity while keeping warm and cold air separated in cooler and freezer applications. A wide range of access automation controls are available to satisfy any application.

*Our growing expertise and experience in high performance doors means
a strong product for Food & Beverage production and distribution.*

- Direct drive systems, electronic safety features and access controls
- High speed door operation minimizes infiltration and increases traffic flow
- Impactable Bottom Bar with auto-reset, reduces maintenance cost and downtime
- Options for light, heavy or insulated vinyl fabric curtains
- Guide, bottom bar and operator heaters available
- Various stock colours available as well as custom colours on request
- Standard vision panel provides added safety for high traffic doorways, optional screen panel for ventilation
- Optional air curtains available for freezer door applications

CHILLFAST, food distribution facility

HDF, full vision door

HDT, freezer blast cell

HDF, equipment sterilization

TNR High Performance Roll-up door models for Food & Beverage Applications

- HDF - High Performance Interior Fabric Door
- HDT - High Traffic Rubber Door
- CHILLFAST - High Speed Freezer Door
- HDFX - High Speed Exterior Door

PARKING & AUTOMOTIVE

***HIGH SPEED, HIGH CYCLE & SECURITY. LOW HEADROOM,
LOW MAINTENANCE AND MINIMAL DOWN-TIME***

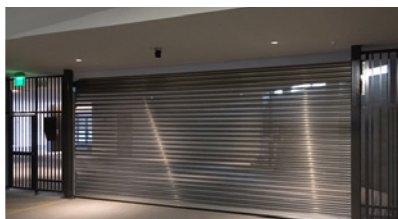

Parking garages present the unique challenge of extremely high daily cycles combined with a need for high speed operation and durability. Extended downtime and high maintenance costs are a thing of the past with TNR's growing line of heavy duty parking garage doors. Facility and property managers need custom door solutions that reduce operational costs and increase reliability. TNR delivers both with our PARK-KING™ low headroom rubber roll-up doors. For the automotive industry our HSR-007 high speed aluminum rolling door offers superior security and aesthetics in addition to high performance.

*Property Managers increasingly see the value of investing in
high performance doors for their parking garage needs.*

- Application of impactable rubber roll-up doors in parking applications provides high cycles, increased durability and reduced downtime
- Low Headroom and Extra Low Headroom designs ideal for underground parking garage applications
- Significantly reduced maintenance costs and headaches for property managers
- Insulated rolling aluminum door - improved security and aesthetics for condominium and automotive retail applications
- Sophisticated electronic controller allows for easy integration into parking environment - security, door activation, toll collection

HSR-007, office tower access

HSR-007, perforated parking garage access

HDP, shopping center parking

HSR-007, retail automotive service bays

TNR High Performance Roll-up door models for Parking & Automotive

- HDP - Parking Garage Rubber Door
- HSR-007 - Aluminum Security Door
- New HDLH! - Extra Low Headroom Parking Garage Rubber Door

LOGISTICS & TRANSPORTATION

MAINTAIN PRODUCTIVITY AND UP-TIME WITH A DURABLE, LOW MAINTENANCE, HIGH PERFORMANCE DOOR

Our world is increasingly on the move and that includes people, raw materials, finished products, and much more. Logistics and Transportation facilities require frequent vehicle access. Efficient movement in and out of buildings demands doors that are fast and reliable. TNR's high performance rubber roll-up doors have proven to be an outstanding solution for reliable service in airports, hospitals, emergency services, transit facilities, manufacturing, warehouse and distributions facilities worldwide.

Providing solutions for applications where standard doors simply aren't up to the job.

- Rugged, harsh environments with high traffic flow, increased chance of door impact and extended downtime is not an option
- Public transit vehicle maintenance and wash bay access
- Manual dock doors in large distribution facilities
- Stadium and conference center freight access
- Rail yard maintenance shops and subway train tunnel portals
- Whether it's a high speed or high cycle door or a combination of both, our team of experts can provide a custom solution for your unique applications

HDT, railcar maintenance

HDC, aircraft manufacturing

HDC-DD, bus transit wash bay

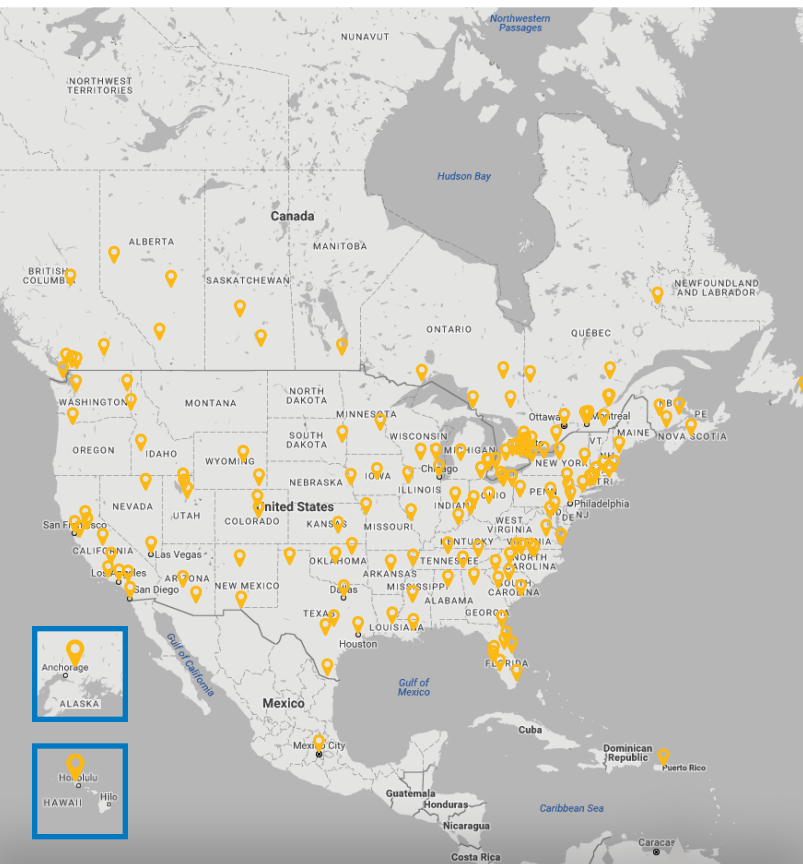

HDS, emergency services

TNR High Performance Roll-up door models for Logistics & Transportation

- HDD - Heavy Duty Rubber Dock Door
- HDS - High Speed Rubber Door
- HDT - High Traffic Rubber Door
- HDC - High Cycle Rubber Door
- HAFX - High Speed Exterior Door
- CHILLFAST - High Speed Freezer Door

HIGH PERFORMANCE. HIGH SPEED. HIGH IMPACT.
